

Where Florida Seafood is Harvested

This information includes the gulf and east coast of Florida

STATE WATERS: oysters, blue crab, clams, mullet, pompano and whiting are harvested within these waters.

240 FOOT (DEPTH) LINE: shrimp, rock shrimp, grouper, scamp, mahi-mahi, red snapper, amberjack, spanish mackerel, king mackerel, shark, pompano, sheepshead, spiny lobster and stone crab are typically harvested from inside the 240 foot depth line.

(DEEPER THAN) 240 FEET LINE: tilefish, swordfish and yellow fin tuna are typically harvested in this area outside the 240 foot depth line.
